Core Skills

AI & AUTOMATION
AI agent development · LLM integration (Groq) · Vision-LLM pipelines · Prompt engineering · Workflow automation

DATA ANALYTICS
Python (Pandas, NumPy, scikit-learn) · Matplotlib & Seaborn · Forecasting & regression · Anomaly detection · Advanced Excel dashboards

DEVELOPMENT
FastAPI · REST APIs · SQL & PostgreSQL · HTML / CSS / JavaScript · App development (Dart) · Git

DESIGN
Graphic design · UI / UX · Brand identity · Canva · Poster design

Certifications

Google AI Essentials
Google · Coursera

Google Data Analytics — Foundations
Google · Coursera

Foundations of Project Management
Google · Coursera

Graphic Design
AllDotDev

App Development
AllDotDev

Professional Profile

AI developer and data analyst with a BS Mathematics foundation, building intelligent systems, analytics solutions and polished digital products. Designed and deployed **AuditIQ**, a live autonomous financial auditing platform, end to end — from the FastAPI backend and anomaly-detection models to the web interface.

Selected Projects

AuditIQ — Financial AI Agent

LIVE · SOLO BUILD

Financial auditing & forecasting platform · Python, FastAPI, Groq LLM

- Multi-agent pipeline for compliance auditing (SECP / IFRS) and financial forecasting.
- Reads Excel, CSV and PDF ledgers plus receipt images through a vision-capable LLM; flags anomalies and projects fiscal outcomes with regression models.
- Generates audit reports with charts in English, Urdu and Roman Urdu; frontend on GitHub Pages, API on Render.

Supply Chain & Warehouse Management System

DBMS PROJECT

Relational database application · SQL, PostgreSQL (PL/pgSQL)

- Dashboard tracking suppliers, products, warehouses, customers, shipments, pending orders and low-stock alerts.
- Order management with status tracking and an inventory ledger that deducts stock automatically per sale.
- SQL query portfolio covering joins, aggregation, HAVING, subqueries, division, views and stored functions.

AI Skill Bridge — EdTech Platform

TEAM PROJECT

AI integration · Personalised learning

- Collaborated on an AI-powered skill-development platform with personalised learning paths, skill-gap assessment and content recommendations.

Advanced Operations Dashboard

DATA ANALYTICS

Excel · Pivot tables & slicers

- Interactive sales-analysis dashboard with pivot charts and slicer-driven filtering.

Ecosystem-Based Algorithms — Research Poster

RESEARCH

Nature-inspired computing · Mathematical modelling

- Designed and presented a research poster on ant-colony optimisation and evolutionary algorithms in AI and financial markets.

Education

BS Mathematics

Bahauddin Zakariya University (BZU), Multan

Awards & Recognition

CRSOM-9 Regional Students Olympiad of Mathematics — Contestant, 2025

Poster Competition, Zakariya Google Developer Club — Participant, 2025
